Quality you can see!

Who we are

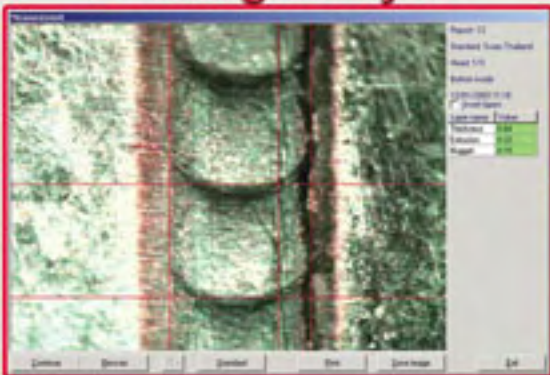

Quality By Vision is a privately owned company specializing in metrology equipment for the canning industry. Producing measurement systems since 1973, the company was the first to introduce a fully automatic double seam inspection system - SEAMetal 9000X, which was launched in METPACK 1993.

The company is well known for high quality, affordable solutions utilizing software, lasers, optical inspection, mechanical and chemical metrology.

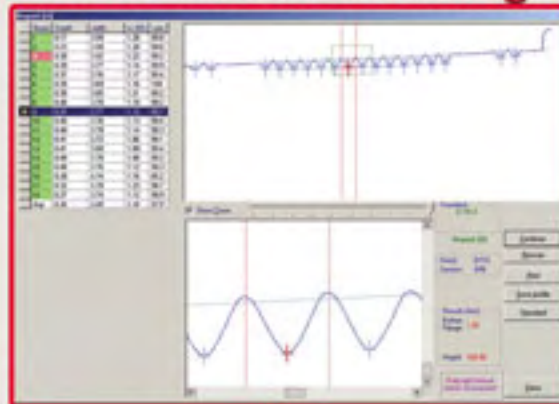

What we do

Our goal is to provide you with a complete solution to your Quality Assurance needs. This means not only addressing a specific problem - but also solutions that will enable you to better monitor your products and produce better products reliably and at an affordable cost!

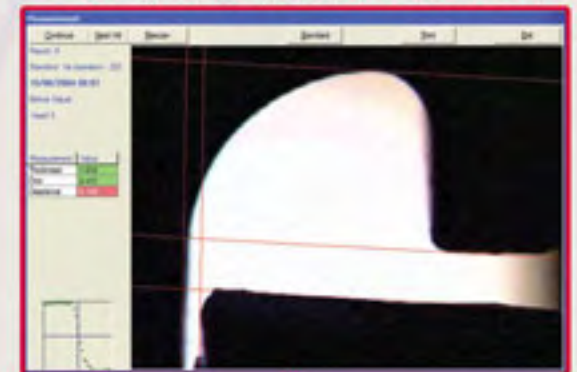

Welding Analyzer

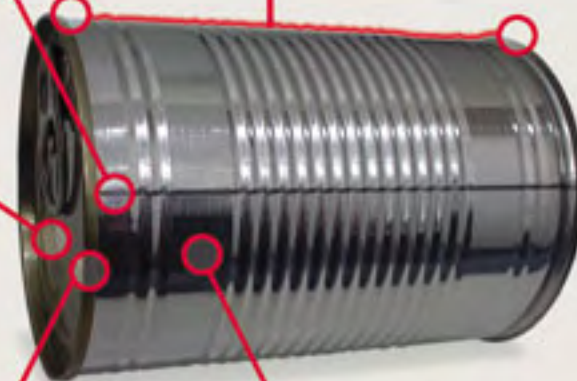

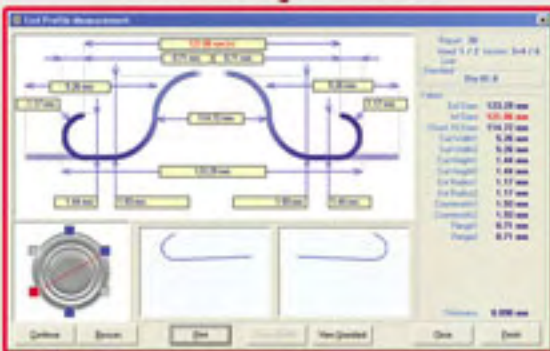

Non-Contact Profiling

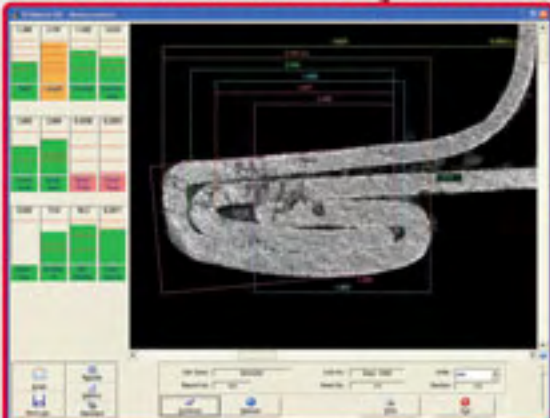

Clearance Measurement!

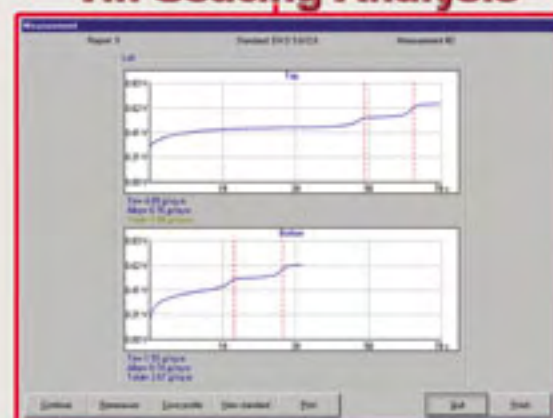

End Inspection

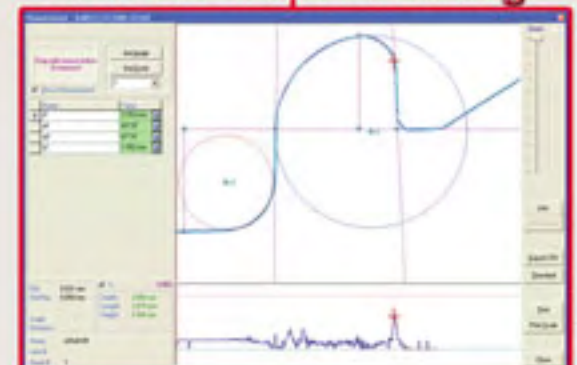

Double Seam Inspection

Tin Coating Analysis

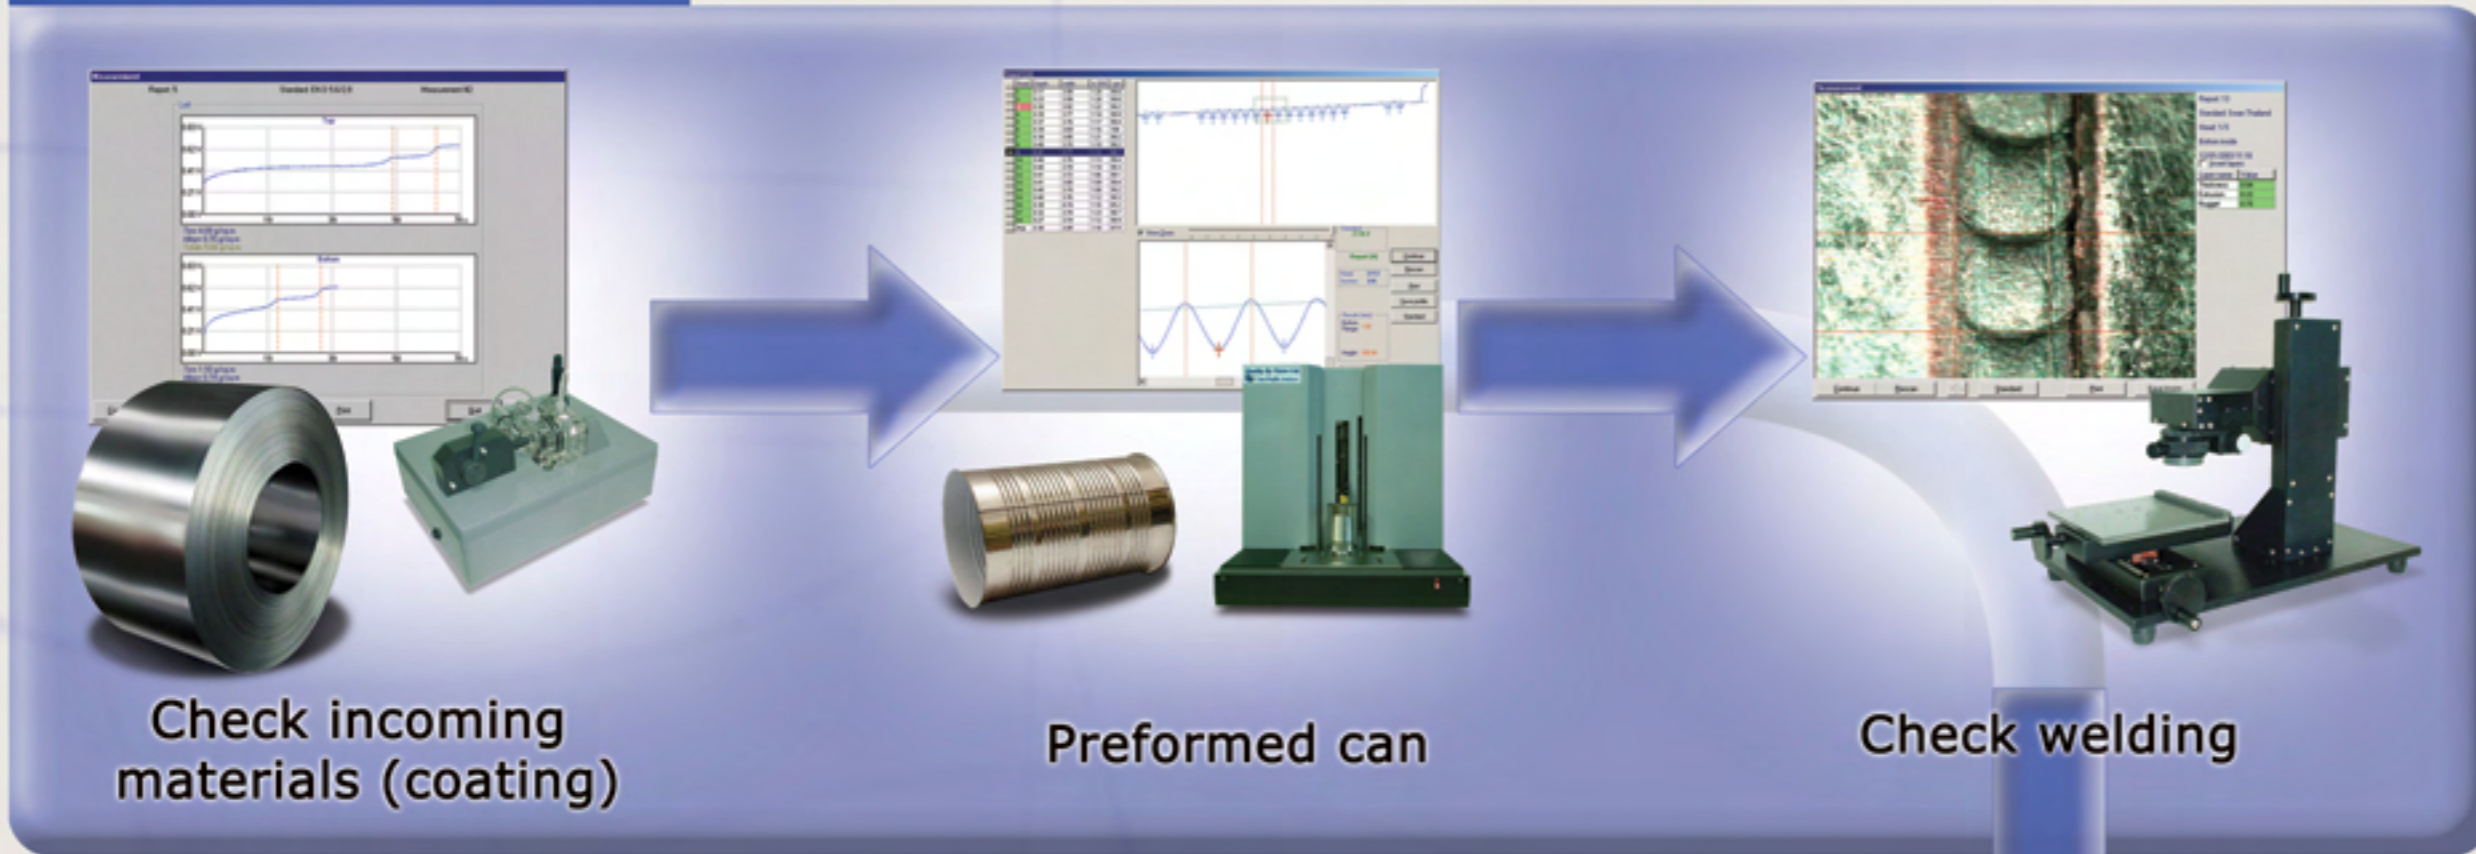

Roll & Chuck Profiling

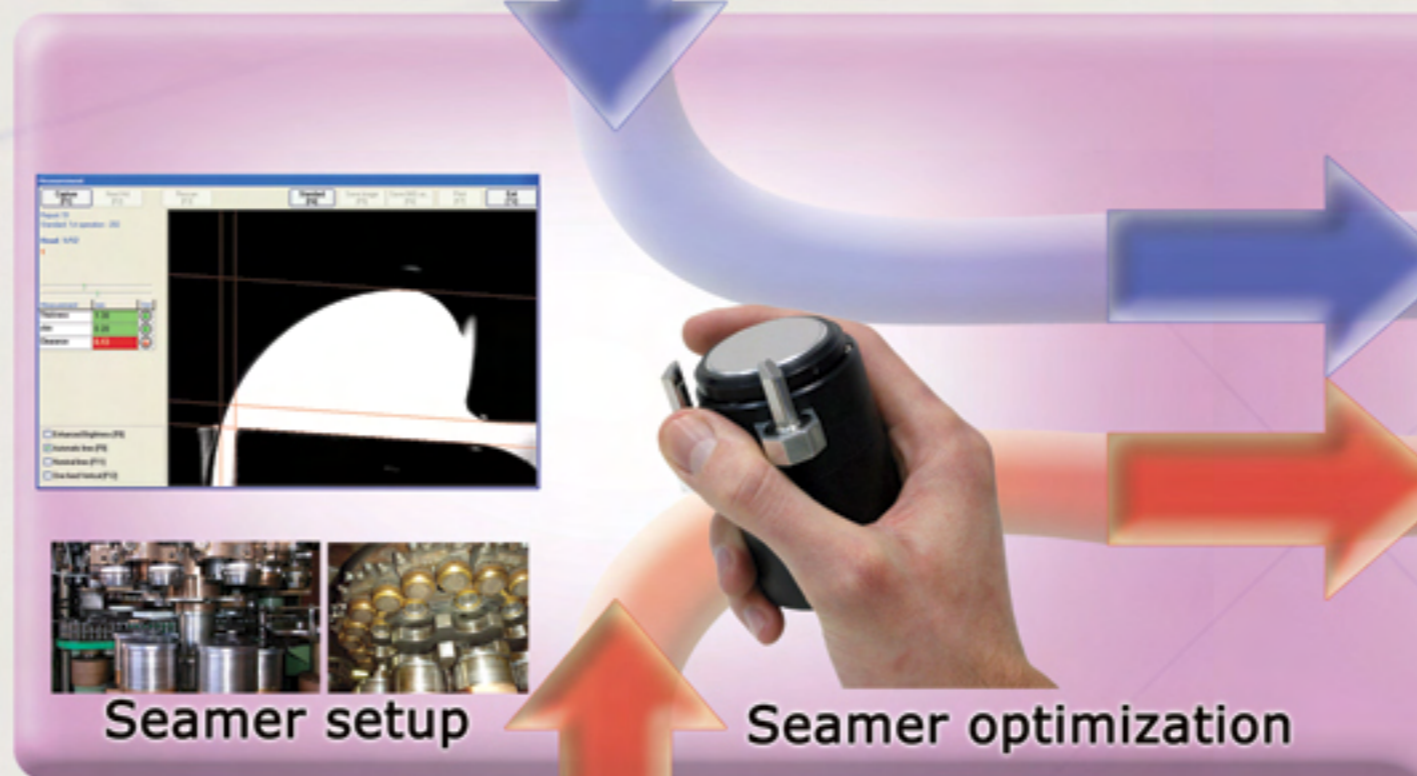

Process control - start to finish

Reach your full potential by checking at every point in your process. Detect and correct production problems before they require the line to be stopped. Follow this roadmap to the perfect product.

Food cans

End control
